Very®

Task Seating

People accomplish a variety of tasks throughout the day. From simple comfort to high ergonomic performance, there's a Very chair for everyone. This family of seating offers versatility in choice and visual consistency in design throughout the building. With patented lumbar support, asymmetrical control, and supportive mesh in the seat back, the Very task chair and stool provide personalized comfort—enhancing the sitting experience so people can stay productive.

Designed for Every Body

Very seating was born out of science-led comfort, offering ergonomic support for people at work. Easy-to-use adjustments let each person tune the chair to fit their needs. Equipped with our patented asymmetrical lumbar support and breathable suspension mesh, the Very task chair and stool are designed to react to your body's movements for optimal comfort.

Features

Haworth collaborates with ergonomic research and development partners to understand the physical relationship between a person and a seating surface. We apply this knowledge to create ergonomic and comfortable solutions that best support people in the seated position.

Back – Provides comfort and flexibility through mesh material that supports your back in all postures.

Optional asymmetrical adjustable lumbar – Adjusts to the natural curvature of your spine for support on the right and/or left side.

Optional upholstered back jacket – Offers additional comfort for longer periods of sitting, as well as aesthetic detail.

Seat – Supports your thighs and alleviates pressure on the back of the knees through upholstered foam and adjustable seat depth.

Pneumatic seat height – Ensures lower limb comfort and eye level; low-position base available.

Mechanism – Enables a comfortable, relaxed posture through balanced 3-point tilt.

Standard back lock – Allows you to lock the seat back in an upright position for computer tasks.

Base – Choose from a standard plastic 5-star base, or optional painted or polished aluminum 5-star base. (Low-position base not available in polished aluminum.)

Arms – Ensure comfort and proper support in different working postures; choose from 4D, height-adjustable, or fixed arms with soft arm caps; armless model also available.

Optional forward tilt – Adjusts 5° degrees downward from initial position to support an upright, forward posture.

Optional headrest – Articulates and adjusts to support your head and neck.

Casters – Available in hard or soft to address workspace needs.

Colors, Materials, Finishes

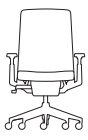

Choose from seven standard mesh colors—for quiet sophistication or vibrant diversity. Leather and faux leather options are available. Optional upholstered back jacket available in all fabrics.

Certifications

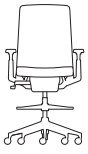

- GREENGUARD® certified
- BIFMA level 3® certified
- May contribute toward LEED® credits.
